# Document Exchange

Document Exchange functions accelerate recurring task in EDI operations.

## Exchange Profiles

Several pages are improved with a new action "Document Exchange" that prompt to the user the available exchange choice for the selected rows. For example "Document Exchange" in Posted Sales Invoice can allow you to send the documents as electronic invoices.

Choices are defined by enabled "Exchange Profile". A profile is an entity with a code, description, formatting specifications and transport. For example "Italy E-Invoice" is a format implementation that converts posted invoices in an XML readable from the Government. As another example "Download/Upload" is a transport implementation that allow you to download the above XML from the browser, but other implementations could send the document directly via web service.

Code ↑	Description	Exchange Format	Exchange Transport	Enabled
→ SDIMAN	Manual Sdl Sending	Italy E-Invoice	Download/Upload	<input checked="" type="checkbox"/>

## Document mapping (cross reference)

During data exchange process is often necessary to map incoming data (for example a code) to others one and vice versa.

Search for "Document Exchange References" and create a new mapping profile. Each profile has a unique code and a description.

With the action "Tables" you can map a local table (for example 18 for the Customer table) with its primary key to a custom value. For example internal code "C0001" can be mapped to "K453" for external operations.

Vice versa with action "Values" you can map a custom value to one or more local table. A typical example is an external combined code for payment method and terms that should be mapped to two internal tables (for example the code "B030" that becomes "BANK" for bank transfer method and "30D" for 30 days terms).

# Remote Functions

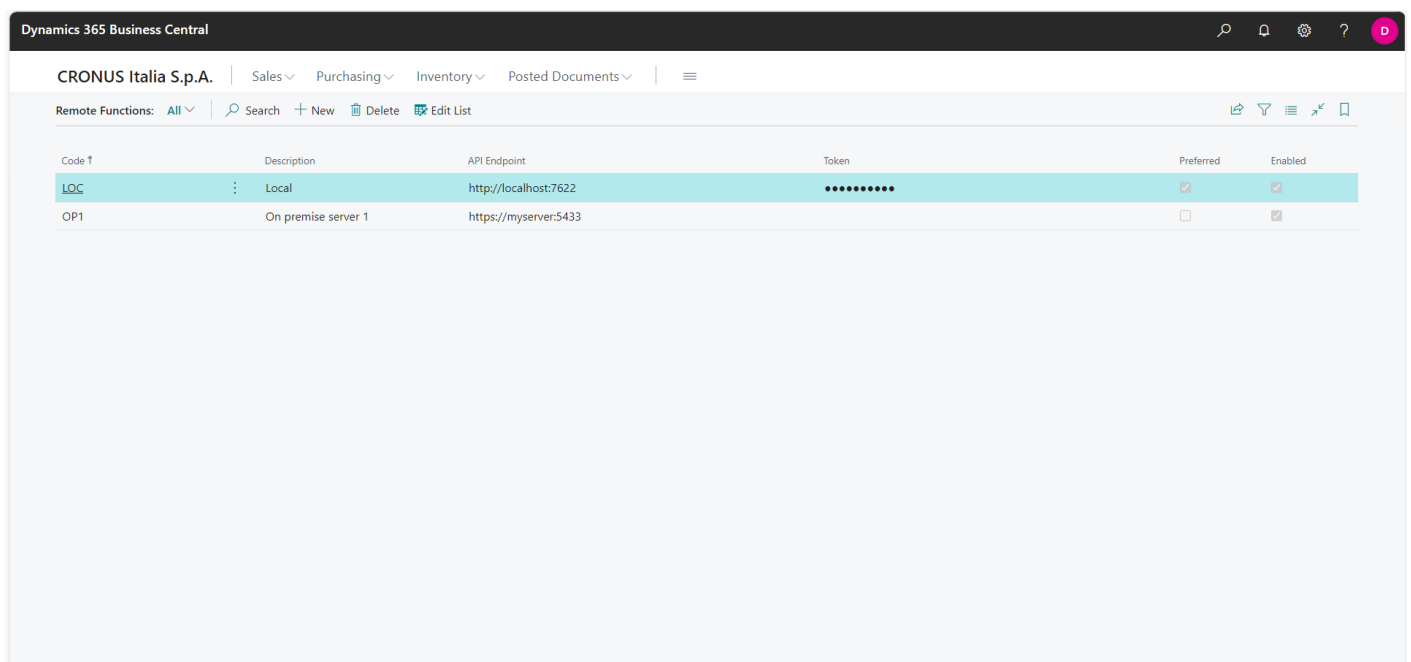

Several "low level" functions are not available in Business Central because they need a physical (virtual) server to be executed. For example: database access (ODBC), local file system, FTP, SFTP...

"Remote Functions" are a convenient way to use these functions via Web Services through a remote server.

The server must be well configured and secured, later you can setup multiple function profiles through the "Remote Functions" page:

- Code and description of the server (to identify it)
- API URL endpoint
- Access Token

The preferred server is used when a specific server is not chosen.

Dynamics 365 Business Central					
CRONUS Italia S.p.A.   Sales   Purchasing   Inventory   Posted Documents					
Remote Functions: All   Search   + New   Delete   Edit List					
Code ↑	Description	API Endpoint	Token	Preferred	Enabled
LOC	Local	http://localhost:7622	.....	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
OP1	On premise server 1	https://myserver:5433		<input type="checkbox"/>	<input checked="" type="checkbox"/>

# Ledger deletion

If allowed by your organization, sometimes is ncessary to delete ledgers, for example in case of a massive mistake.

Deleting legers is often prohibited and can make your accouting inconsistent. You must know what you are doing.

## User Setup

To allow the function enable "Allow Ledger Deletion" flag in "User Setup" page.

## Deletion

Select the action "Delete Document" from these pages:

- General Ledger Entries
- Posted Sales Invoice
- Posted Sales Credit Memo
- Posted Purchase Invoice
- Posted Purchase Credit Memo

# Partner Group

To ease filtering of Customer and Vendors, a new field "Partner Group" is added to Master Tables.

Some example groups:

- **V-SER**: Service Supplier
- **V-LEA**: Leasing Supplier
- **IC**: Intercompany Partner
- **C-TOP**: Top Customer

"Partner Group" table is common to Customer and Vendors.

# Order types

Order types allow to group orders by several categories and easily find them.

"Order Type" can be assigned to:

- Sales
- Purchase
- Orders or return orders
- Invoices or credit memo

Order types extends invoice posting policy per document basis.

# Partner Area

To ease filtering of Customer and Vendors, a new field "Partner Area" is added to Master Tables.

Some example groups:

- **C-EU:** Central Europe
- **I-NORTH:** Italy North
- **I-SUD:** Italy South
- **NY:** New York

"Partner Area" table is common to Customer and Vendors.
