

# G/L Adjustment Entries

During the closing of fiscal periods, it's often necessary to integrate the general ledger with adjustment entries. These entries are considered as draft or temporary, so they are not ready to be posted.

The "G/L Adjustment Entry" is a specific table to register these entries and view the amounts in the Chart of Account and Financial Reports. The Adjustment Entries does not take part to fiscal ledgers and can be canceled in any time.

## Post as Adjustment

Simply fill a new batch and select the action "Post as Adjustment".

The entries will be transferred in the special ledger and can be viewed through Chart of Accounts in the column "Adjustment Balance".

# Cancel the transactions

Adjustment Entries can be canceled in any time, modified and then posted again or deleted.

To cancel the transactions, identify the entries in the G/L Adjustment Entries page and select the action "Cancel transactions".

The entries will be transferred to the source journal.

# Financial Reports

To sum normal entries plus adjustment entries you can use Financial Reports.

In the Column Definition you can select Adjustment Entries as ledger entry type.
