

Item Taxes

This function allows to track or charge specific taxes per item (for example "Accisa" in Italy for some kind of goods).

Taxes can be applied to specific customers/vendors or group of them.

Taxes can be calculated per unit of measure or by a conversion rate. Tracked entries can be exported to various Government Agency.

The screenshot shows the Dynamics 365 Business Central interface. The main window is titled "Item Taxes" and displays a table with the following columns: Item No., Item Unit of Measure, Item Quantity Factor, Tax Group, Tax Type, Tax Quantity, Tax Unit Amount (LCY), and Tax Unit Measur. A single row is visible with the following data: Item No. RMG070, Item Unit of Measure (empty), Item Quantity Factor 1,00, Tax Group ACC, Tax Type ACC, Tax Quantity 1,00, Tax Unit Amount (LCY) 3,09, and Tax Unit Measur (empty). The table is part of a larger application window that also shows a sidebar with "Item Card" and "Inventory" sections.

Item No.	Item Unit of Measure	Item Quantity Factor	Tax Group	Tax Type	Tax Quantity	Tax Unit Amount (LCY)	Tax Unit Measur
→ RMG070		1,00	ACC	ACC	1,00	3,09
