# Introduction

iPharma solution for pharmaceutical industries is a powerhouse of technology for Companies that distribute and sell drugs and parapharmaceuticals.

The distributors will find, ready to use, several features:

- Drug tracking, serial, lot and expiration management, UDI (Unique Device Identification) handling
- Integration with automatic stores (for example KNAPP™, ROWA™, RIEDL™ …)
- Goods handling by mobile computers
- Automatic order receiving (for example FARMACLICK™)
- Shipping lines management and picking timetables
- Integration with drug databases (for example BDF™)

The pharmaceutical retailer will use this reliable warehouse management system for its network of drug stores, directly owned or franchiseed.

Also the interfaces with the common store's softwares are ready to use (for example CGM™, PHARMASERVICE™ …)
